-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 October 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

1. This Office action is in response to the amendment filed 10/13/2009. Claims 1-36 are pending.

2. The disclosure is objected to because of the following informalities: the specification should not reference the claims by number and at line 3 of [0035] it appears that "now" should be -- not --.

Appropriate correction is required.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to clearly describe what "connected non-positively" means.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what the metes and bounds are of the limitation "connected non-positively".

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3, 5, 8, 11, 14-16, 26, and 28-36 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/73245 to Pedretti.

Figure 10 shows an embodiment with hollow body 1 and at least two pairs compression/tension elements 2 connect non-positively as best understood via pure tensile element 4 which passes around an outside region of the hollow body. When the embodiment of figure 10 is loaded as illustrated in figure 2 the upper element 2 would be in compression and the lower element 2 would be in tension according the laws of bending. Figure 2a) shows an embodiment where the tensile elements 4 pass through gas tight channels 12/13. Figure 7 shows an embodiment with at least two hollow bodies arranged parallel to the compression/tension elements 2. The cross sections vary over the length at

least at the ends and middle. A plurality of cross members 20 are shown in figure 7.

9. Claims 1, 2, 5 and 11 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 3,987,736 to Miller.

Miller provides compression/tension elements 16 connected non-positively as best understood via sack 18 which also acts as a pure tension element.

Inflatable hollow body 12 is provided between elements 16. When loaded in bending the uppermost member 16 will be in compression and the lowermost member 16 will be in tension.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT J. CANFIELD whose telephone number is (571)272-6840. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rich Chilcot can be reached on 571-272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
